

Anushk Kumar

Roll no. 2023115 | anushk23115@iiitd.ac.in

DOB: 06 March, 2006

Address: New Delhi, India

Education

Indraprastha Institute of Information Technology, Delhi

B.Tech (CSE)

2023 - present

CGPA: 7.66

(Till 6th semester)

Delhi Public School , Gautam Buddh Nagar

CBSE, Standard 12, PCM+CS

2021-2022

Percentage : 89.8%

Delhi Public School, Gautam Buddh Nagar

CBSE, Standard 10

2020 - 2021

Percentage : 96.7%

Skills

Expertise Area: Web Application Development, UI/UX Design, Hybrid Vision Systems

Programming Languages: Python, C++, JavaScript, Java, Rust

Tools and Technologies: Git, GitHub, GitHub Actions, Next.js, Google Cloud Platform, Cloud Function Service, Vercel, React Native, Figma, Framer, Supabase, LaTeX

Technical Electives: Data Structures & Algorithms, Computer Organisation, Algorithm Design & Analysis, Database Management Systems, Operating Systems, Multi-threaded Programming, Meta-iOS Development, Machine Learning,

Work Experience

Product Intern

May 2026 – July 2026

Adobe Systems Inc, India

- Developed a Novel Method for controlling Core Native Desktop Applications UI like Adobe Illustrator through Agents. (In Review for Patent)
- Developed a robust harness to drive Autonomous QE Testing with subagents and modern design methods. Multi Client connection offered
- Overall Speed up was 3x to normal workflow with validated task percentage to 93% of total tasks.

Live Link: [Adobe](#)

Undergraduate Researcher (Short Term)

Jan 2026 – April 2026

IRAS-Hub, Robotics Research

- Developed a Natural Language Interface (NLI) to query and extract data from ROSBag files, streamlining robotic log analysis.
- Executed complex simulations and computer vision pipelines to validate autonomous vehicle algorithms for the IIITD-ALIVE project.
- Deployed containerized environments for reproducible research across heterogeneous robotic hardware.

Live Link: [IRAS-Hub Website](#)

Undergraduate Researcher (Short Term)

July 2025 – Dec 2025

HiPeC - IIITD ; High Performance Computing Lab

- Engineered a quantized Large Language Model (LLM) optimized for HPC CPU architectures, significantly reducing inference costs while maintaining performance.
- Achieved **87.25% accuracy** on the HPCorpus dataset by implementing ONNX Runtime, Grid-Ada LoRA fine-tuning, and GGUF compression.
- Authored technical documentation detailing the integration of OpenMP-based problem solving with low-resource inference strategies.

Project Document : [HERE](#)

Tech Stack: Pytorch, Python , CUDA , ONNX-Runtime

Live Link: [HiPeC-IIITD](#)

Founding Engineer

Jan 2025 – July 2025

Resxiv – Integrated Research Support Platform

- Architected a scalable backend system supporting **100+ concurrent users**, utilizing FastAPI and Spring Boot for high-availability microservices.
- Developed a reactive frontend featuring isolated development environments, integrating Monaco/AceEditor for code-native capabilities.
- Optimized SEO strategies via semantic context mapping and automated sitemap generation, improving platform indexing and discovery.
- Orchestrated CI/CD pipelines and cloud infrastructure using Docker and Cloudflare to ensure low-latency global delivery.

Tech Stack: TypeScript, TailwindCSS, Better-Auth, FastAPI, TeX Live, Python, Java, Spring Boot, Docker, Cloudflare CDN, FramerMotion, GSAP.

Projects

KryptVault - End-to-End Encrypted Storage System

Team Size-5
(July, 25 – Dec, 25)

Developed a zero-knowledge file storage platform utilizing XChaCha20-Poly1305 AEAD encryption and libsodium for secure key wrapping. Engineered a cross-platform Tauri desktop client and a high-performance Hono backend to manage encrypted S3-compatible data uploads. Built on Rust, Tauri, TypeScript, Hono, and PostgreSQL [here](#).

MedicaMS- Clinic Management System

Team Size-4
(Jan, 25 – July, 25)

Postgres Database deployment of a medical clinic management including features of a custom query interface, different user roles and access management. Built on NextJS,with Drizzle ORM and Better Auth [here](#).

AngryBirds – GUI game

Team Size-2
(Oct 24 - Dec, 24)

A 2D-GUI Game, made in Java with LibGDX framework.Uses concepts of serialisation,screen interfaces ,2D physics, and Multithreading. Highlight Feature: Random Level Generations Repository [here](#).

TrueSight: Gradational Redaction, Masking, and Anonymization Tool

Team Size-6
(July 24 - Dec, 24)

TrueSight is an innovative NLP and Vision-based redaction tool that allows user-defined gradational redaction, masking, and anonymization across multiple input formats, including text, images, PDFs, and videos. Repository [here](#).

Positions of Responsibility

Lead Design Engineer - StarkVision-Research	(Jan,25 – Present)
Design and Web Team Lead @ ESYA 2025	(Jun 25 – Aug 25)
Member @ Build-IIITD	(Jul,24 - Present)

Awards and Achievements

- Won 1st Stage of Grand AI Challenge 2025, by NCIIPC (NTRO), India

- Co-Authored a paper on Spinal Stenosis Diagnosis, accepted at CVPR Demo 2025, Nashville, USA
- Co-Authored a paper on Deepfake Video Detection accepted at MAD workshop @ ACM ICMR 2025
- Runner Up in SIH2024 Hackathon Grand Finale (Team Level)
- Google Arcade Facilitator Recipient : Premium+ Milestone

Declaration: The above information is correct to the best of my knowledge.
